## WORK EXPERIENCE

### **Publicis Sapient - Lloyds Bank**

Feb 2019 - Current

Joined Publicis Sapient as a Full stack developer.

Was immediately contracted to Lloyds banking group to assist the company in digitising its business user's journey.

Joined the team as the only developer that knows UI development. Helped with design discussion and training other developers.

Helped modularised their apps, created shared libraries and CI/CD pipelines for UI applications.

Developed API endpoints for the backend service using NodeJs, Loopback I/O and Jest.

Contributed to moving their backend services to containers using Docker and Kubernetes.

Was involved in Client meetings, gathering requirements, determining OKRs and breaking business epics into stories.

**Perfect Channel - Senior Developer**

July 2017 – Jan. 2019

Perfect Channel are experts in creating intelligent, enterprise-level auction and trading technologies. A system similar to Ebay technologies but for Business-to-Business(B2B) high volume trading.

Joined the company in its early stage of transitioning its infrastructure to AWS, was part of the team that did research/development and develop POCs.

Lead a feature team that was involved in breaking the monolithic application in microservices.

Worked hand-in-hand with the Operations team in developing and planning out the CI/CD pipelines.

Given lack of resources, transitioned to frontend development and helped developed component-based UI using ReactJS, Typescript, Webpack.

Gave brown-bag sessions on clean code, soft skills, Devops-in-practice.

Gained experience in Leadership, team management, TypeScript, Reactjs, Nodejs, Couchbase, Elastic Cache, microservices, AWS, Docker, Kubernetes.

**TotalJobs Ltd - Full Stack Developer**

Feb 2017 – June 2017

Worked as part of the team that deals with SEO and Search aspect of the TotalJobs sites.

Programmed in C#, AngularJs, Python, LESS and Bash.

Helped with the integration of external APIs such Google Adwords, Lucence Search and Stepstone Data Repo.

Extensively use practices such pair programming, code review, white-boarding session to collaborate with team members and discuss ideas.

**Ticketmaster International -.Net Developer**

April 2016 – Dec 2016

Joined Livenation tech team with Ticketmaster in April 2016

Was part of the team that researched and developed the company's first content driven site using Umbraco, React and Bootstrap LESS

---

Was part of the team that developed and released the company's first REST API using .NET Core.

Use practices such pair programming, TDD, BDD, continuous integration to develop high quality maintainable code.

Refactor and iteratively maintain/upgrade older parts of the platform while still delivering business value.

Helped with the adaptation of microservice/modular development.

Participated in the DevOps movement by helping with the integration of teamcity, octopus, SonarQube, AWS deployment.

Participate in requirement gathering, stories grooming, prototyping and deployments.

### **FundAssist – .Net Developer**

Oct. 2014 – Feb 2016

Joined FundAssist in October 2014.

Was tasked with moving legacy VB codes to C# and legacy Winforms applications to Web Applications.

Set up test suites using TDD with Nunit enable Continuous Integration.

Maintain ASP.NET Web Form applications, troubleshooting and upgrading  
Integrate services such as Message Queue (RabbitMq), Lucene Search, SQL database to support new and existing applications.

Participate in client meetings, prototyping and deployments.

Programmed in C#, VB.NET, JQuery, AngularJS, LESS (css), HTML, Razor, MSSQL.

Gained valuable understanding of SOA messaging and workflow concepts

### **eGrocer (Buy4now) - Net Developer**

July 2010 – Sept 2014

Joined Buy4now as graduate after winning a hackathon competition. Buy4now specialise in developing ecommerce websites, mobile sites/Apps and back-end integration solutions to businesses.

Development was done using C#, ASP.NET, MSSQL and Razor, mostly in a .NET environment.

Assisted in the development of load test API in C# to ensure full coverage of functionality using NUnit & Rhino Mocks.

Gained invaluable experience in the areas of teamwork, Agile Development and software design principles and patterns.

#### OTHER WORKS

Spent some time doing Internships at IBM, computer shops and internet cafe.

#### HOBBIES

I'm a big fan of instrumental music, Jazz, Bass and afro-beats, often write songs and creates beats.

I enjoy social get-together after work either for some social drinking, live sport games or live music.

During the weekend, i often enjoy blogging, watching football or just going for a run/cycle.
